

Start new project

This is a guide for starting a Vivado project without defining source files in the “New Project” wizard. Before you start this guide you have take sure that the board files from Blackboard is placed in the right directory.

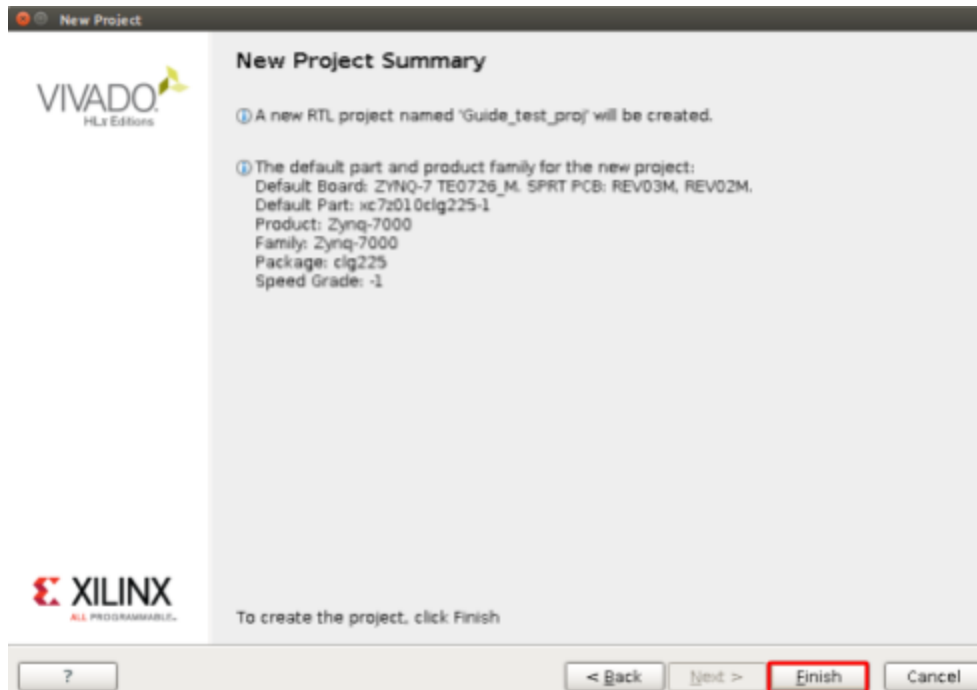

- 1) Press File->new project
- 2) Create a new vivado project click “next”
- 3) Enter project name and workspace. Choose create project subdirectory
- 4) Select RTL Project and the check mark “Do not specify...” and click next

- 5) Select “Boards”, Vendor: trenz.biz, Display Name: ZYNQ-7 TE0726_M... (see image below) and select the one available and click “Next”.

6) In the “New Project Summary” check that everything is as it should be before clicking “finish”

7) Your screen should now look similar to this:
